

2003 IBM GRAPHICS AND VISUALIZATION STUDENT SYMPOSIUM

CALL FOR STUDENT NOMINATIONS

The IBM Professional Interest Community for Graphics and Visualization is organizing a Student Symposium to take place at the IBM Thomas J. Watson Research Center in Hawthorne, NY, on November 10, 2003. This one-day event will consist of presentations of state-of-the-art IBM technologies as well as presentations of original university research by promising Ph.D. students.

The goal of the symposium is to give Ph.D. students the opportunity to learn about IBM Research, meet with IBM researchers, and present their own scholarly research.

Nomination of high-quality students in the area of Graphics and Visualization on all levels are encouraged; but students near the end of their Ph.D., and students who are or have been funded by IBM (e.g., through fellowships, internships, or Faculty Awards) will be given special consideration. **Nominations should be made by university faculty or IBM Research members** and should include the student's CV and a letter of recommendation describing the quality of the student, the significance of the student's achievements, and any current or previous association of the student with IBM.

To have adequate time for student presentations and interactions, participation will be limited. Selections will be based upon several factors including: quality and significance of nominee's achievements, relevance to IBM's research interests, prior or current relationships with IBM, and our desire to have a diverse group of institutions and research areas represented.

Limited travel funds are available.

Relevant Dates:

Nomination deadline: September 30, 2003
Acceptance notification: October 8, 2003
Symposium date: November 10, 2003
