

# 2005 IBM GRAPHICS AND VISUALIZATION STUDENT SYMPOSIUM

## CALL FOR STUDENT NOMINATIONS

The IBM Professional Interest Community for Graphics and Visualization is organizing its third annual Student Symposium to take place at the IBM Thomas J. Watson Research Center in Hawthorne, NY, on December 6, 2005. This one-day event will consist of presentations of state-of-the-art IBM technologies as well as presentations of original university research by promising Ph.D. students.

The goal of the symposium is to give Ph.D. students the opportunity to learn about IBM Research, meet with IBM researchers, and present their own scholarly research.

IBM Research is soliciting nominations of exceptional Ph.D. students who are currently conducting research towards their dissertation in the areas of computer graphics or visualization. **Nominations should be made by university faculty or IBM Research members** and should include the student's CV and a letter of recommendation describing the focus of the student's research and the significance of the student's achievements.

To have adequate time for student presentations and interactions, participation will be limited. Selections will be based upon several factors including: quality and significance of nominee's achievements, relevance to IBM's research interests, and our desire to have a diverse group of institutions and research areas represented.

**Limited travel funds are available for this event and will primarily be used to cover local hotel accommodations. Invitees should plan to cover the remainder of their travel expenses.**

### Relevant Dates:

**Nomination deadline: November 6, 2005**  
**Acceptance notification: November 9, 2005**  
**Symposium date: December 6, 2005**

### Email nominations to:
