

Grace Explainer

Point A was dragged to a position vertical to previously dragged point B. However, a vertical relation already exists on these two points. Therefore, no new relation was added.

Point A was dragged to a location approximately horizontal to point C; therefore, a horizontal relation was attached on the two points.

Point A was dragged to a position horizontal to previously dragged point D. However, point A and point D are already implicitly constrained to be horizontal to one another. Therefore, no new relation was added.
